PROFESSIONAL SUMMARY

Full-Stack Developer with 5+ years of experience designing and building modern, scalable, product-focused web applications. Core stack: React, Next.js, TypeScript, C#, .NET, Node.js, and SQL (PostgreSQL / SQL Server). Proven track record delivering medium- and large-scale projects — including solutions for multinational companies — spanning front-end architecture (SSR, SPA, Design Systems), RESTful APIs, automated testing, Docker, and cloud deployment (Azure and AWS). Experienced in AI-powered engineering using AI Agents, Prompt Engineering, and agentic workflows with Claude, Gemini, and Codex.

WORK EXPERIENCE

Full-Stack Developer — Nova Singular

Mar 2021 - Present | Ribeirão Preto, Brazil

- Delivered end-to-end Full-Stack solutions across 6+ production web platforms for corporate and multinational clients using React, Next.js, TypeScript, Blazor, and C# (.NET / MVC).
- Engineered and integrated RESTful APIs with C# (.NET) and Node.js using Entity Framework, Dapper, and Prisma over PostgreSQL and SQL Server, implementing secure JWT authentication.
- Architected scalable front-end codebases (SSR, SPA, Design Systems) with React, Next.js, Remix, and Astro, and responsive interfaces using HTML5, CSS3, SASS, Tailwind CSS, and Bootstrap.
- Built automated test suites with Jest, Vitest, xUnit, Playwright, and Cypress while enforcing Clean Code principles and optimizing Core Web Vitals, Technical SEO, and web accessibility.
- Containerized applications with Docker, automated CI/CD pipelines, and deployed across Azure and AWS, using Git/GitHub for version control, Agile/Scrum workflows in ClickUp, and AI Agents / Prompt Engineering workflows (Claude, Gemini, Codex).
